

Bird control mitigating measures

Bird radar

- We will come back to this tomorrow...
- We have also been approached by Pharovision, infrared camera surveillance

Mowing robot

- Stavanger airport use robots to mow parts of the grass areas close to the RWY.

Lasers

- OK effect used during overcast or dusk/dawn
- Within 300-400 meters
- Important that they are easy and handy to use

Gas cannons

- Used in Bergen and Trondheim
- Bergen:
 - Activated remotely by bird control staff
- Trondheim
 - Activated remotely by ATC

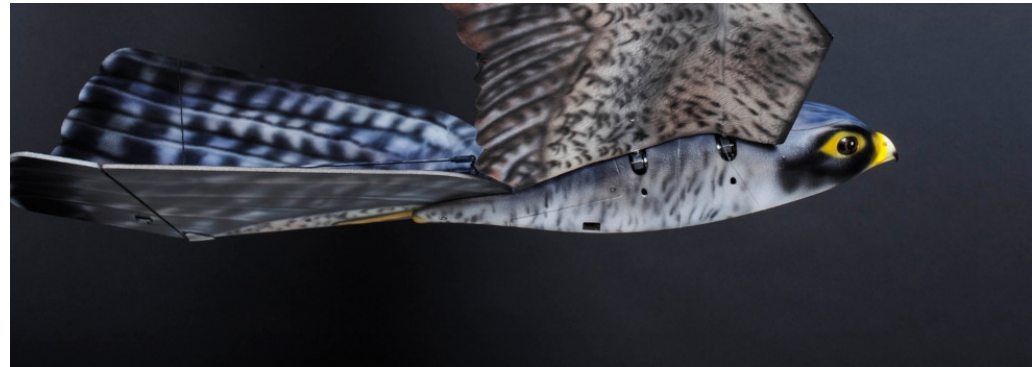

Biannual onference Avinor Birdcontrollers

- Gardermoen
- Participants from Norwegian airports
- Earlier visits from CPH
- Martin shared his experience with us in the last meeting

Norwegian Environment Agency

- Regular meetings with Avinor
- Participates in the Norwegian Birdstrike committee

Robot Falcon

- <https://vimeo.com/139229069>
- Clear flight solutions
- Very good results on wine-farms (no documentations seen)

Light reflecting devices

- Used on airports in Sweden?
