

# Wildlife management at Aalborg Airport

1st of June 2016

# Challenges

- Herring Gull (sølvmåge), Rooks (råger), Lapwings (viber) & Swallows (svaler)
- Common buzzard (musvåge) & Kestrel (tårnfalk)
- Geese & Swans
- Deer

# Riskassessment

- Is based on a five year average.
- It will take a few years before we see the full effect of our initiatives.

		Hyppighed/sandsynlighed				
		>10	3-10	1-2,9	0,3-0,9	0-0,2
Rate		>0,3830	0,1149 - 0,3830	0,0383 - 0,1148	0,0115 - 0,0382	0 - 0,0114
		Meget høj	Høj	Moderat	Lav	Meget lav
Alvorlighed	>20%	Meget høj				
	10-20%	Høj	Sølvmåge	Musvåge	Sildemåge	
	6-9,9%	Moderat			Ringdue	
	2-5,9%	Lav	Tårnfalk Stormmåge	Mosehornugle Spurvehøg Vibe Hættemåge		
	0-1,9%	Meget lav	Landsvale	Sanglærke Engpiber	Mursejler Gråspurv	
		Meget høj	Høj	Moderat	Lav	Meget lav

# WHY?

- The airport is situated next to a Fjord
- Groundwater level creates wetlands
- Farming (corn and change in use)
- Nature reserves

# Focal points

- Drainage
- Cutting of the gras
- Education
- Area management
- EU139/2014
- "Safe places"

# Tools

- Scare hawk
- Gas Canon
- Laser
- Pyrotechnics
- Rifle caliber 17 with HMR ammunition
- FLIR (forward looking infrared)
- New bird control education

# Future

- Radar
- Ascend
